Magnesium

A palatable high magnesium mineral, vitamin and trace element bucket for grazing cows and ewes at risk from grass staggers.

Features & benefits:

- Contains a high level of palatable bioavailable magnesium for use where there is a risk of grass staggers, especially in lactating livestock.
- Fortified with minerals, vitamins and trace elements to help balance potential deficiencies in forages.
- Contains a good level of protected zinc ideal for where there is a risk of lameness and mastitis.
- Available with added copper.
- Available in 22.5kg and 80kg formats to suit your system.

Ideal for:

- Dairy and beef cows at risk of grass staggers during spring and autumn.
- Ewes post-lambing.

User guide:

- Offer free-access at a ratio of one 22.5kg bucket per 35 head of sheep or 15 head of cattle.
- Ensure ad-lib forage is always available.
- Not suitable for ewes pre-lambing or ram lambs.

Typical intakes:

- Cattle up to 200g/head/day*.
- Sheep up to 40g/head/day*.

**Consumption will be influenced by number of feedpoints per head of stock, forage availability and quality, other feeds available, age and breed of stock and proximity to water sources.*
