Milking Machine & Tank Cleaning

Power Liquid

High strength chlorinated caustic detergent for circulation cleaning of milking machines and DX bulk tanks.

- Concentrated formulation
- Phosphate free
- Suitable for machine or bulk tank
- Can be used with hot or cold water
- Moorepark approved
- Recommended usage rate in cold water is 1% (1L Kilcosan per 100L of water)
- Recommended usage rate in hot water is 0.5% (500ml Kilcosan per 100L of water)

Direct to Line 1

A chlorinated alkaline detergent specifically designed for circulation cleaning of milk pipelines in hot water.

- For use in hard or soft water areas
- Specifically developed for direct-to-line milking parlours
- Usage rate 500ml to 100L of water
- Designed to be used in conjunction with Night Wash

Power Powder

A powerful alkaline powder detergent for circulation cleaning of milking equipment in hot water.

- Concentrated caustic, chlorinated, non-foaming powder
- Designed for CIP and manual cleaning of dairy equipment
- Effectively cleans and sanitises all internal surfaces of the milking machine
- Usage rate 100g per 40L of water

OctaKlean

Powerful chlorine free alkaline circulation detergent suitable for use with all parlours and bulk milk tanks.

- High cleaning performance, sequestrant concentration and effective causticity
- Low foaming, degreasing, anti-scaling
- Effective in hard water areas
- Free of chlorine, phosphate and EDTA to limit the release of controversial components into the environment
- Biodegradable wetting agents

Milking Machine & Tank Cleaning

Direct to Line 2

A high phosphoric acid detergent for the removal of scale deposits in milking equipment and bulk milk tanks.

Hyspray PA5

A versatile peracetic acid sanitiser, cleaner and acidifier. For final rinse of milking machine, cluster dipping and automatic back flush systems.

Milkstone Remover Plus

Designed for the removal of scale deposits in milking equipment and bulk milk tanks.

DX Autotank

A chlorinated alkaline detergent designed for automatic cleaning of DX Bulk Tanks, Milk Silos and for circulation cleaning.

- Assists with the cleaning of milkflow meters
- For use in hard or soft water areas
- Usage rate 500ml to 100L of water
- Designed to be used in conjunction with Morning Wash

- Instant kill on contact with clusters
- No rinse needed after use at recommended usage rate
- Use 0.3% (30ml Hyspray PA5 (pump) per 10L of cold water)
- Stops cross contamination between cows via clusters thereby reducing somatic cell count (SCC) and mastitis

- High performance descaler, removes milkstone and lime deposits from milk plants
- For best results use hot water
- 1L Milkstone Remover per 100L of water - scale prevention
- 3L Milkstone Remover per 100L of water - removal of heavy scale

- For cleaning direct expansion tanks
- Caustic / chlorine based cleaner
- For use in hard or soft water areas
- Contains unique blend of sequestrants and soil suspending agents
- Effectively cleans and sanitises all internal surfaces of the direct expansion tank
- Use 500ml to 100L of water (0.5%)

Teatcare

Optima Iodine Concentrate

Bactericidal, yeasticidal and virucidal disinfectant.

- Good skin conditioning
- Versatile / economic - can be used 4:1 or down to 9:1 dilution rate
- Suitable for both pre and post milking application
- Proven teat disinfectant to aid in the control of mastitis

Uddershield

Ready to use Iodine based barrier film dip with emollients for superb longer lasting teat condition

- Contains Glycerine & Aloe Vera for superb teat condition
- Low pH level without causing irritation
- Easy to apply low wastage
- Leaves protective residual film

Novashield Pre / Post

Novashield contains optimised levels of complimentary acting biocides for both short acting and long-lasting protection until teat canal has closed after the milking process.

- Suitable for pre and post milking application
- Suitable for foam, spray and dip applications
- Blue colour ensures high visibility on teat
- Fly repellent

Power Blue Mix

High performance (2 part) post milking teat disinfectant, remains stable for two milkings and has a low usage rate

- A powerful chlorine Dioxide based post milking teat dip
- With superb skin conditioning the bright blue product is very visible after application
- This highly efficient teat dip aids in the control of mastitis
